

# Reavell®

An Ingersoll Rand Business

## Protect Your Investment and Maximise Efficiency

Reavell Aftermarket solutions deliver  
peace of mind and maximise efficiency  
and uptime

# Protect your investment

Providing peace of mind, increased running efficiency, and lifetime value. Protect Your Investment with Reavell.

## Perfect with pressure

Building on a 120 year heritage, Reavell continues to maintain its position at the leading edge of compressed air technology. The engineers behind the first Scott-Reavell steam engine, patented in 1894, probably wouldn't recognise our current high pressure compressor range, but they would certainly identify with our relentless drive for technical excellence and quality customer service.

As part of the global Ingersoll Rand High Pressure Division, Reavell continually invests in research and development, with the goal of continuously maximising uptime and lowering operating costs.

Our unique compressor solutions are designed to offer market leading performance characteristics, including maximum volumetric flow for their size and power input. They deliver unrivalled performance and peace of mind for customers operating in some of the world's most demanding environments - at sea, on land and underground.

# Protect your investment

Reavell compressors represent a significant investment for your business. Our peace of mind approach, increased running efficiency, and lifetime value makes us your perfect aftermarket partner.

## Providing peace of mind

Reavell is committed to actively supporting its solutions throughout their lifetimes - whether that's through routine maintenance kits, life extending scheduled factory refurbishments or immediate support whenever required. We pride ourselves on providing you with lifetime value.

Our service kits are tailor made for your compressors, and provide genuine Reavell parts - peace of mind that you will have the right parts you need, when you need them. When the time to carry out your service comes, the Reavell design allows easy access for maintenance, and our market leading service times ensure downtime is kept to an absolute minimum.

At Reavell we emphasise lifetime value. Our state of the art refurbishment centre is uniquely positioned to extend the life of your machine, providing continuous support for up to 30 years. When it comes to protecting your investment – rest assured, Reavell can handle the pressure.

- Full Service Kit Packages
- Unrivalled Product & Technical Support
- Compressor & Component Refurbishment
- Onsite Commissioning & Training

# Service your investment

Regular servicing provides you with the peace of mind that your machines will continue to run efficiently and deliver the critical output that you require. Reavell service kits are proven to prolong the lifetime of your machine.

## Maximising your efficiency

Servicing intervals vary depending on the application and site conditions and have been optimised to maximise the efficiency of wearable parts, while minimising the risk of downtime to your machines.

Run times between each service have been determined by the Reavell engineering team, with the aim of maximising the lifetime of wearing parts and ensuring the running efficiency of your investment.

Below is an example of some of our popular compressor blocks and their recommended service intervals.

RUNNING HOURS/ SERVICE KIT						
100	1500	3000	4500	6000	7500	9000
HSK2283	HSK2291	HSK2305	HSK2313	HSK2321	HSK2291	HSK2356
HSK3883	HSK3891	HSK3905	HSK3913	HSK3921	HSK3948	HSK3956
HSK1015	HSK5711	HSK5754	HSK5746	HSK5754	HSK5711	HSK5762
HSK1201	HSK1228	HSK1236	HSK1252	HSK1244	HSK1228	HSK1260

## Optimised Service Kits

From nitrogen boosting to air engine start, every Reavell compressor has its own set of service requirements. Reavell service kits provide all the necessary components to enable you to carry out field services and repairs efficiently.

We can guarantee that while each machine's service requirements may vary, our service kits uphold the same quality and reliability standards that you can expect from any Reavell compressor. Each kit contains 100% verified Reavell parts, which will maintain your warranty, and delivers peace of mind to our partners in business.

## Genuine parts

Reavell is the only source for parts that fulfill the stringent manufacturing standards needed to ensure uninterrupted equipment performance and to maintain your warranty.

Our parts are designed and manufactured to the highest standards to guarantee optimum performance and life time efficiencies.

When it comes to high pressure compressors, safety is paramount. With genuine spare parts, your Reavell machine will not only run at maximum efficiency, but also be safe for your personnel and plant. Ensure that you have peace of mind when it comes to the running efficiency of your machine, with Reavell genuine parts.

# Preserve your investment

## Legacy

Every new purchase represents a significant investment and we recognise that for some customers, it may not always be financially viable to replace an older machine with a newer, more efficient model.

That's why at Reavell we pro-actively work with you during the lifetime of your compressors to ensure that they operate at their optimum efficiency.

Contact your local sales representative to find out what support we can offer for your installed compressors.

# Preserve your investment

## Warranty

Reavell's compressors have been designed to provide many years of trouble free service. However, even the most reliable products require regular servicing and maintenance. That is why we provide a 12 month manufacturer's warranty, as standard. Bespoke extended warranty plans are available and can be discussed at point of sale.

Our aim is to offer complete peace of mind for your compressor operations, and to eliminate the risk of any unforeseen costs, so that you can focus your attention and any future investment on your plant and operations.

# Maximise your investment

## Refurbishment

Depending on the planned lifetime of your systems, replacing compressor units is not always a viable option. That's where our high pressure refurbishment centre comes into its own. It is the only major high pressure refurbishment centre in the United Kingdom and it has supported customers across industry for many decades.

Our Centre of Excellence enables us to offer full diagnostic evaluations and can also recommend maintenance programs, designed to bring your existing high pressure system back to its optimum operating performance level. With a dedicated team to deal with your refurbishment requirements, Reavell are uniquely positioned to add extended life to your compressor. All refurbished machines receive a full factory test upon completion of rebuild to ensure that they're in perfect condition.

## Reavell training days

At Reavell we're proud of our products - and proud to share our expertise! We offer a comprehensive range of factory training days. Our courses cover everything from important health and safety requirements and aftermarket basics, to in-depth machine maintenance training.

We can also design a bespoke training course to meet your specific requirements. So whether it's sales training centred on technical features and USPs or hands-on maintenance training for your engineers, we can deliver the course you need. Our training courses can be delivered at our Centre of Excellence. Alternatively we can deliver bespoke training at a location and venue to suit you.

To find out more about our training courses, or to book a course, speak to your local Reavell sales representative.

## Global presence

In addition to our UK based service engineers, we have a global footprint. Wherever you are in the world, Reavell's certified service engineers are available to you. Our engineers are trained on site at the Centre, where they undergo comprehensive training to ensure that each engineer meets the exemplary quality standards that Reavell demands.

Responsiveness is key to us, we understand the urgency to keep your machines operational and running at peak efficiency, so we guarantee a swift response to any issues you may have.

# Protect your investment

## Aftermarket Solutions for High Pressure Applications

### PERFECT WITH PRESSURE

Offering peace of mind, increased running efficiency, and lifetime value. Protect your investment with Reavell.

### PEACE OF MIND

- Obtain peace of mind with our wide range of service kits, specifically tailored to your machine.

### MAXIMUM RUNNING EFFICIENCY

- Reavell's bespoke maintenance plans keep your compressor at maximum running efficiency, long into its lifetime.
- Genuine Parts eliminate the risk of unforeseen costs, maintaining your warranty and allowing your machine to run at maximum efficiency.

### REFURBISHMENT CAPABILITY

- Offering a full diagnostic evaluation and recommending maintenance programs which will bring your existing High Pressure system back to optimum operating specification.

For more than 150 years, Ingersoll Rand has been a leading global provider of compressors, blowers and vacuum pumps. OEMs and end-users from every corner of the world rely on us for their business solutions.

With global teamwork, strong customer focus, and vast application knowledge, our brands provide reliable, energy-efficient products that serve a wide range of manufacturing and process industries.
